

**VIRGIN ISLANDS WATER AND POWER AUTHORITY  
(VIWAPA)**

**PR-21-21**

**“ON-SITE ENVIRONMENTAL, INC.”**

**DEMOLITION AND FIREWATER PUMP HOUSE CONSTRUCTION  
AT RANDOLPH HARLEY POWER PLANT**

**Clarification II**

Date: JULY 29, 2021

Clarification to Offeror:

---

1. On the Questionnaires for both Component 1 – Demolition of IDE Foundations and Concrete; and Component #2 – Demolition of Tank #10 you did not answer the question related to waste disposal “Have you personally inspected the site(s) of the proposed work? Describe any anticipated problems with the site and your proposed solutions. How will you handle disposal?”. Can you clarify how you will handle waste disposal for both Component 1 and Component 2?
2. Pursuant to the Scope of Work Section 5.0, bullet 5.1 Introduction, sub-bullets 4 and 5; bullet 5.2 Overview of Project; Bullet 5.3, sub-bullets 4 and 5; and Bullet 5.4, sub-bullets 4 and 5, please clarify that you are (1) aware of the Contractor’s responsibility for obtaining permits and certifications for waste disposal; (2) aware of the requirements/criteria of the permits and certifications for accepting waste

and waste disposal; (3) aware that the majority of the waste has to be taken off-island with the exception of some items being permitted, certified and accepted by the local waste agency and landfill; and (4) your pricing for component 1 and component 2 is inclusive of all requirements to properly dispose of all known waste?
