

FACT SHEET

Campo Rico, St. Croix Waterline Rehabilitation Projects March 2023 Progress Report

Campo Rico Waterline Rehabilitation

Project Description: Replacing the Campo Rico community existing old Ductile Iron waterlines with approximately 21,500 linear ft of new PVC pipes, valves, meter boxes, and hydrants.

Construction Start: Construction to start early March with trenching to begin mid-March.

Project Timeline: March 2023- December 2023

Funding: Territorial Drinking Water Capital Improvement Program by the US Environmental Protection Agency (EPA) - **Estimated Funds:** \$7,295,450

What to Expect: All residents in the area should be aware of construction activities that will impact road conditions, dust and noise levels as well as some scheduled water service interruptions as the new system is installed, tested and activated.

Rehabilitation Process

Design

The Design Contractor, Caritech, surveys the area and creates the plans for the project based on Federal Guidelines.

Construction Solicitation

The Contractor, VI Paving, is selected to do the work according to the provided plans.
